He and David Fanshier, husband of Barbara, SJMS Spanish teacher, have entered the great National Canoe Race.

The race will begin on the Arkansas River at Hutchinson, Kans., and will end 1,256 miles later at the mouth of the Mississippi in New Orleans.

The race will begin May 27 and hopefully will end June 8.

Sgt. Bunting can be seen working out on the weights in Banes gym and jogging to get in shape for the endurance contest being sponsored by several national firms including Holiday Inns of America and Budweiser beer.

The two will make the journey in a 17-foot aluminum canoe. The contest sponsors are expecting 50 to 100 entries from 39 states.

Chiles Removes "A.D. 1887"

Dean Chiles, Maintenance superintendent, removed the tiles bearing the inscription, "A.D. 1887" from above the entrance to Vail Hall recently.

Ascending the crane tower to the top of the three-story structure, Chiles and Danny Smith, project supervisor, chipped the tiles from the free-standing, skaking front wall and lowered them to the ground.

Chiles commented that any risk taken was because he thought the school should have the tiles for use in the proposed academic, administration center.

The president of the Pierre Chapter of the American Field Service wrote the School expressing appreciation for the Crack Squad's performance in that South Dakota city.

Leo Pietrus wrote, "The presentation of the Colors by the Color Guard at the beginning of the basketball game was very impressive. The performance by the Crack Drill Squad was outstanding and gave the Pierre citizens a chance to see something very unique to this area. Please express our thanks to each of the boys and our congratulations for a job well done!"

Magnetism, Electricity Studied

Magnetism and electricity are being studied in the physical science classes taught by Lt. Col. R.L. Guernsey, Science teacher.

Among the topics covered in lab work was a study of the behavior of magnets and the relation to electricity.

The Cadets produced static electricity including a quarter million volt charge with a Van de Graf generator. Each Cadet has made an electro-magnet and a generator.

They have learned the transformation of electric energy to magnetic energy to mechanical energy by studying the parts and functions of electric motors.

Electricity has been produced with chemicals and lemons and oranges.

They also have electro-plated various items with copper and zinc.
